#### Aroused Over Killings by **Prohibition Agents.**

Washington, D. C., May 15.—[Special.]—One of the bitterest prohibition debates in this session of congress was precipitated in the senate today when Senator Copeland [Dem., N. Y.] submitted numerous newspaper edi-torials and resolutions adopted by civic and fraternal organizations all over the country condemning the shooting of Jacob D. Hanson, promi-nent Niagara Falls, N. Y., citizen by

two coast guardsmen.

The New York senator's hope that the proposed senatorial investigation of coast guard prohibition enforcement methods would compel abandonment of the "shoot to kill" polley stirred Senator Bruce [Dem., Md.] into a denunciation of prohibition and of the "organized hypocrisy" which condones the Hanson shooting and similar "dastardly outrages."

Alms Bill at Killers.

Another direct result of the Hanse by Representative Sabath [Dem., Ill.] hat he is preparing a bill which, enacted, would wipe out the right of "hair trigger" dry agents accused of murder or manslaughter to the pro-tecton of federal courts against state court prosecution.

During the eight years of Volstead

Bearch for the slayer of Miss Pearl ism numerous attempts by state authorities to prosecute killing agents have been balked by the interference of federal district attorneys who have persuaded federal judges to assume terday. The Center of Chicago's Famous Skyline Michigan Avenue at Adams Street

ONE of our large tenants with Chicago offices in four buildings, desires to consolidate all these offices. Lack of available space in Peoples Gas Building makes it impossible to meet the increasing needs of this tenant. And so it happens—for the first time since the building's completion—a fair amount of space is now available in Peoples Gas Building. This space is being leased in individual units to suit the needs of tenants.

Make no mistake about this offering: It can be overlooked only at sacrifice of hundreds of dollarsthat is, if you care about driving the finest of motor cars.

The new Club Brougham is every inch a Pierce-Arrow—the most coveted automobile in America.

Aristocratic, from the visor of its fender headlamps to the graceful streamlined apron which masks the gasoline tank at rear.

New and sparkling of line, rich in color combinations, and modish as a Parisian gown.

Built of such quality materialswith such fine handwork precision -that not an ounce of excess weight retards its magical getaway, its thoroughbard fleetness.

And, because of its fine watchlike construction, it is wonderfully easy to handle, remarkably economical of maintenance.

Its lightness of weight means corresponding lightness of fuel and oil consumption—and substantial savings on tires.

Every modern device for fine motor cars is included in the new Brougham's regular equipment. Ordinarily, these would cost an additional several hundred dollars.

For example, there are Houdaille Shock Absorbers all around. A commodious trunk on rear. And six-ply balloon tires which last about twice as long as the ordinary.

The chassis lubrication system lubricates all vital points at one time by the single pressure of a foot

In short, nothing has been spared to make this car the most noteworthy offering of the hour-in all things that make an automobile

By all means, see the new Pierce-Arrow without delay.

COMMISSION to finance an American fight on leprosy is being formed. The movement is to be a memorial to Gen. Wood.

General Wood was both a military man and a physician. He entered the army as a surgeon. During several campaigns against Indians in the west he served as an army surgeon, but he slipped in some sword work when there was nothing for the scalpel to do.

One of the debts which the country owes Roosevelt is for paving the way for Wood from the medical to the fighting forces of the army. This is a peculiar statement for this space, and, therefore, the explanation must hurry forward. When we took over Cuba we were pledged to make Havana healthy by controlling yellow fever and malaria. At the time we were not equipped to make good the pledge. The effort to rout yellow fever from Havana would not have succeeded had the governer of the island been any other than the doctor and general—two in one—Leonard Wood. terested in leprosy. His experience in the Philippines had convinced him of three points. One was that leprosy could be cured and prevented. Another was that it was prevalent enough to be important. The third was that so long as there was leprosy around we were not whelly safe. He was organising a campaign against leprosy when he died. The status of leprosy on the North American continent is about as follows: It is moderately prevalent. A considerable amount of it has been brought mount of it has been brought

here, partly by European immigration, and partly by Asiatic. Paradoxical as it may seem, our fear we did nothing about leprosy except to have a spasm whenever a case was found. There are always a few cases of leprosy around every large city. One may be serving in my house. Health officials have been sure of this for years, and yet let a newspaper story about a leper break and everybody goes into a funk.

The disease, as it exists with us, in very mildly contagious. It is less so than consumption and pneumonia, and far less so than measles, smallpox, and

The federal government is now operating a leper colony at Carville, La. Year by year an increasing number of lepers are gathered up and sent to Carville. There they are given good care and scientific treatment. Some are cured. In Hawaii, where this policy has been longer in operation, a fair number of lepers have been released on condition that they report periodically for examination.

He was unable to land, for wherever he made an attempt he found the Spanish soldiers waiting for him. it. A bill to prevent federal courts from summing up the evidence for the jury passed the senate almost without debate, and the press seemed unaware that anything important was taking place. A proposal to throw the federal bench into polities by making the judges elective and therefore subject to politicians and popular whims does not draw a comment from the press. But the people, the press, and the congress cannot rise above their education, and popular education in our constitutional philosophy has been and is very near popular education in our constitutional philosophy has been and is very near to zero. That is the source of our troubles, in congress and out of it. Undless the people can be "indestrinated," as THE TRIBUNE has more than once said, they must fall at self-government. ## THIS V-TYPE ENGINE SUPREME AMONG EIGHTS

LHE following of the V-type 8cylinder Cadillac and LaSalle-men and women who seek the finest of fine cars—is so large and so loyal that it constitutes almost the entire market in this field.

There is no room in this field for others, except those with limited production, and limited production itself puts them out of the running so far as real rivalry with Cadillac is con-

These others are forced to make their market at a price. Then they must compromise in their manufacturing in order to fit into the price division they have selected-with the inevitable result that eventually they eliminate themselves forever from the Cadillac-La Salle class.

Cadillac's market is so large that Cadillac can continue to give buyers more in engineering, experience and experiment; more in magnificent manufacturing; more in superb dress; more in the all-round superior performance of its unique power plant-the surpassingly excellent

It is safe to say that Cadillac and La Salle offer more in everything that assures owner satisfaction than any others in the industry can give. For there is no other car with such an engine and no other car that commands a volume sufficient to give as much as Cadillac does - without arging a heavy price penalty.

Cadillao and La Salla, therefore, remain alone. And day by day it becomes increasingly evident that if you want the kind of our which leaves - nothing to be desired you must turn to Cadillac and La Salle, because nothing else is available.

Cadillac welcomes an opportunity to prove these statements.

Lawyers, assessors, reviewers, and ndary yesterday on the subject of xation, as it was learned the coun y towns of Cook county are given preferential consideration over Chiin real estate valuations.

we try to fix the tax value at 40 per cent of the assessed valuation is nearer 15 per cent than 40 per cent of the real value," said John E. Conroy, chairman of the board of assessors.

"That, however, is because each of the thirty townships in Cook county outside Chicago has its own assessor, who fixes valuations. We have asked those local assessors to make a general increase, but they had no hesitation in refusing."

Politics Gets the Blame.

Politics Gets the Blame.

Political bad luck would attend any of the five members of the board of assessors and the three members of the board of review who might seek to override the action of the local assessor, it was explained. Therefore, it was agreed, the suburbanite can give his Chicago neighbor the laugh in the present series of complaints against high taxes.

The order of the state tax commission for a reassessment has added to the confusion, it was explained because county officials have been unable to determine from the wording of the order just what must be done. There is a question as to whether the 1927 valuations must be revised or whether equalizing the 1928 valuations will be sufficient.

A half dozen lawyers met yesterday with the officials and a half dozen different opinions resulted. They adjourned without having solved the problem.

Towns Increase 30 Millions.

Figures were then obtained show-ing that while the increase for all Cook county real estate, after revision, was \$485,265,258, the real estate values

was \$485,265,258, the real estate values in the thirty townships were increased only \$30,764,792, in spite of the many new buildings and subdivisions.

Figures were not available yesterday to show whether the board of assessors or the board of review reduced any of the valuations fixed by the country town assessors. Originally the assessors increased Chicago's real estate valuations \$769,320,408, or approximately 28 per cent.

St. Louis, Mo., May 15.—(P)—
Through lanes of cheering crowds the crew of the Bremen, first airplane to cross the north Atlantic from east to west, paraded here today.

Amid tributes of bursting bombs and confetti-bright air, Baron Ehrenfreld Gunther Von Huenefeld, Capt. Hermann Koehl and Maj. James Fitzmaurice passed along the route followed by all those the city welcomes ceremonlously.

Now and then Maj. Fitz-thaurice would lean over to grip the hands of youngsters.

Last Official Reception.

Tens of thousands lined the parade route. The crowd was so dense at Ninth and Olive streets that the procession was temporarily blocked.

The parade was the principal public ceremony in honor of the flyers who arrived here late yesterday from Milwaukee and will leave tomorrow morning for Detroit.

The parade ended at the city hall,

Runaway Girl Found as She
Tries to Become Newsboy
(Pleture on back page.)
Grace Morse, 12 year old daughter of Dr. and Mrs. Charles L. Morse of 1022 South Scoville avenue, Oak Park, was back with her parents yesterday after a brief experience as a runaway.

She had told an untruth to her mother and fear of detection had caused her to decide to dress like a boy and run away from home. She applied to Martin Dwyer, division superintendent of Trie Triesung for a job as newaboy late Monday night. He became suspicious about the shrill voice when he was accosted by the freckled faced urchin at Dearborn and Madison streets and took the child to the detective bureau. There she confessed and yesterday was turned over to her parents.

Countless thousands are asking this question simply because they do not know of a SAFE AND SURE REMEDY!

DANDRUFF is a forerunner of GRAYNESS and BALDNESS!

BUT—why have DANDRUFF, GRAY OR FALLING HAIR?

Mother nature has supplied mankind with herbs which, when properly compounded, will eliminate both DANDRUFF AND GRAYNESS, also stopping the ABNORMAL FALL OF HAIR! This preparation will also PREVENT DANDRUFF AND GRAYNESS, it being impossible for either to appear where it is properly used!

## ASK METHODISTS TO PICK BISHOPS PROVINCES

#### Methodists Vote Confidence in McConnell.

Kansas City, Mo., May 15.—[Speal.]-The issue of imperialism arose in the Methodist general conference here today when a measure was presented permitting groups of Methodists, when organized into central conferences, to elect their own bishops. At present such conferences are organized only in the foreign fields of the church. Europe has three, Asia three, Latin America and Africa one each.

three, Latin America and Africa one each.

Nobody objected to granting this added measures of self-government to Methodists outside the United States, but when it was proposed that American Methodists might be put in the same boat by the forming of central conferences in this country, many delegates took alarm. Like the English a few years ago they were willing to give the church's "colonies" a dominion status, but they balked at the mere prospect of accepting the same status for the dominant section of the church.

The foreign delegates wanted no provision which would single American the granted, to other sections of the church.

There are inhety-sight foreign delegates in the conference, who under the present law of the church hards the present law of the church share in many actions which affect the church in America alone. They you read that the church had been a section and the church had been a section and the church had been an equality with the American delegates. Often they hold the balance of power on bothy debated legislation. On the other hand, they must accept American blabops to direct their work in whose selection they had little or no ways by the decisions of a body in which they are cultumbered eight to one. IN May, it is not too late to make a substantial saving on your next winter's fuel bill. Nor is it toe late to put your coal in before your house and lawn are groomed for the summer.

Low prices make it a mighty good time to fill your bins against next winter's cold. Then during the winter, you'll be keeping warm without spending money for fuel that you would if you put off buying until fall.

Reading Anthracite is at its best in May. Preparation standards are higher than ever before. That means more coal per ton. Shipping conditions are right so that Reading Authracite reaches your dealer in perfect condition, and it does not crumble when stored.

Your dealer can put it in at the hour of the day that suits you best. Nor will he have to haul it through a storm to you.

Saving in cost, saving in getting the cleanest fuel, are yours if you fill your hins now.

Your dealer has Fathous Reading Anthracite or can get it. Insist on the coal that sets the page.

RCA RADIOLA 18—In solid mahogany cabinet, walnut finish. Operates from electric light circuit—110 volt, 60 cycle, A. C. Uses high-power Radiotron rectifier and 6 alternating current Radiotrons. Special RCA electrically-lighted tuning dial. \$115 (less Radiotrons)

The most popular of all Radiolas—the simplified alternating current receiver-improved and beautified-and lower in price.

Everything that the sensational Radiola 17 had to establish its overnight nation-wide popularity is in the new Radiola 18.

But the unprecedented public demand for this wonderful instrument has made possible its manufacture in larger quantities at a lower cost. And along with this the engineers have improved the selectivity of the circuit-just a bit finer tuning.

The fine mahogany of the "17" was one of its marks of superiority. The new cabinet, in its walnut finish, is a still handsomer piece of furniture.

Radiola 18 is another achievement of the Research Laboratories of RCA, General Electric and Westinghouse-pioneers and leaders of the radio industry.

## Adkins Holds Griffs While Sox Bat Out 3 to 2 Victory RECORD DOESN'T

**Even Series** 

BY IRVING VAUGHAN. [Chicago Tribune Press Service.]
Washington, D. C., May 15.— Through the pitching efforts of Grady

the White Sox rose up this afternoon and smacked down the Senators to earn an even break in the four game series.

Addens was not around when the last happening of the combat was recorded, but he remained 10 ng enough to receive credit for a 3 to GRADY ADKINS.

2 decision, which was not final until Ted Lyons had rushed to the rescue with two runners on and only one out in the ninth, Until three successive whacks in the last frame made his removal imperative Adkins had yielded only stx hits and one run, but this tally might have been avoided if the high and lofty tumbling Bill Barrett had not scotted in the wrong direction for a long fly ball.

Addens was not and described for Lisenbee is fourth.

## WEELING CHICAGO TWO weeks ago Havana Ribbon came to Chicago. Thousands of stores took on its sale. Everywhere box after box was quickly emptied. Thousands upon thousands of Chicagoans received their first taste of one of the largest-

selling five-cent cigars in the world. . . . And a gratifying taste it has been to them! It has brought home to them the realization of what ripe tobacco can mean in a cigar. Proved to them that in Havana Ribbon the nimble nickel buys more cigar value than it has ever bought, before or after the war.

Shove one of your own loose nickels across the nearest cigar counter and get the story direct. . . . Smoke Havana Ribbon. Note the true tobacco flavor. No bitter, bitey under-ripe top leaves. Not a trace of flat-tasting over-ripe bottom leaves. Nothing but the rich, fragrant, fully-ripe middle leaves of choice tobacco plants . . . age-cured to mellow-mildness and rolled into the finest five-cent cigar mortal man ever

## 4 GREAT PROOFS OF BUICK SUPERIORITY

Five years of service is only a starting point for BUICK. Skilled engineering and rugged construction make it the most durable of motor cars!

Keep in mind, when buying your new car, that more than three-quarters of all the Buick cars produced in the last twenty-five years are still serving their owners.

Buick endures - Buick stays young - Buick stands up and gives its best over a longer period than any other car-because it is gned, engineered and built in the better

An extra-rugged double-drop frame-Buick's world-famous Sealed Chassis and Triple-Sealed Engine—and the most nearly perfect oiling system ever developed-endow it with an unrivaled ability to "keep on keeping on."

Day-after-day dependability is the normal thing with Buick. Flawless operation is a matter of course. 100,000 miles is only a starting point in Buick's long career of service.

You'll prefer Buick because it leads in beauty and luxury: and you'll prefer it, too, because it is the most durable of cars - and therefore the most paying investment.

## WHAT MAKES H.O. STONE **BONDS SAFE?**

No. 11 of a Series

#### Loans' Made On a Basis of Hard Times

O SECURITY based on a continuation of pros-perity will satisfy the cold scrutiny of the conservative investor. In real estate financing only a pessimistic attitude can ever be safe.

In the making of H. O. Stone & Company First Mortgage Bonds we provide against possible hard times. We base our financing on the worst that can happen.

Consider our loans on apartment buildings. Though filled practically to capacity, these buildings could still pay the interest on their bond issues if from 30 to 35 per cent vacant. Rents also could be greatly reduced without impairing the safety of these securities. We make ample allowance for vacancies and rent reductions that might occur due to a possible over-supply.

Because we operate conservatively, investors in our bonds often find themselves owning securities backed by earnings greatly exceeding our estimates. A recent survey comprising eighty-seven typical H. O. Stone & Company bond issues disclosed the fact that the properties securing them were 95.7 per cent rented.

Invest through this house which has gained seasoned judgment through years of experience—whose bond customers in good times and bad have never lost a dollar—a house where prosperity is always discounted.

40,000 Shares Joseph Horne Co.

Common Stock (No Par Value)

CAPITALIZATION 6% Cumulative Preferred Stock (Per Value \$100 Per Share) . \$7,500,000 

Mr. J. B. Shea, President of Joseph Horne Company, has summarized in part his letter regarding the Company as follows.

opies of this letter may be had from the undersigned upon request.

BUSINESS

"The Joseph Horne Company is the oldest department store in Pitteburgh. It was established in 1849, by and under the name of Joseph Horne, who shortly afterwards was joined by C. B. Shea and A. P. Burchfield as partners. Continuous control by the same families through succeeding generations has made for a permanence of policies and has served to identify the store, throughout its community, as one of standards and traditions.

The store's volume of business has more than kept pace with the growth of the community, having increased from \$4,294,062 in 1901, the year of incorporation, to \$20,697,731 in 1927. The business throughout its 79 years has maintained the position of Pittsburgh's leading high-class store and enjoys a high reputation both with its public and with the trade.

A new corporation, Joseph Horne Co., will be organized and will acquire, by merger, all of the assets subject to the Habilities, of the present companies, Joseph Horne Company and the Joseph Horne Land Company, a wholly-owned subsidiary, which has heretofore held title, free of any lien or encumbrance, to all of the real estate of the Company.

PROPERTIES

PROPERTIES The enterprise had its beginning in a single room of about 30 x 120 feet. The store now occupies three-quarters of an entire block, at the intersection of two of the city's principal business thoroughfares. It has a total street frontage of 985 feet. The buildings average seven stories in height with a floor space of 510,000 square feet. In addition, two floors, with a total of 30,000 square feet, are leased in a building opposite. A new nine-story service-warehouse building, now being erected and soon to be ready for occupancy, will provide 425,000 square feet of floor space and will thus release large additional space for selling in the store.

PROFITS AND BALANCE SHEET The combined net profits of the Joseph Horne Company and subsidiary company after making adequate provision for depreciation and after deducting Federal income taxes at 13½%, as certified by Messrs. Price, Waterhouse & Co., were as follows:

\$1,200,471.19 1,309,358.60 1,366,624.06 1,226,396.97 916,624.06 776,396.97

The balance sheet of Joseph Horne Co. as at January 31, 1928, giving effect as at that date to the proposed organization of the new Company and other transactions in connection therewith, as certified by Messrs. Price, Waterhouse & Co., shows net tangible assets of \$14,955, 216.83. Current assets amount to \$9,151,430.00 as compared with current liabilities of \$1,646,073.61, a ratio of over 5.5 to 1. Of the net current assets of \$7,505,356.39, \$1,894,897.24 was in cash.

POLICIES The store's merchandising policy demands complete stocks of medium and better grade merchandise, and places importance on style leadership. Seconds and sub-standard or imperfect merchandise are not bought, sold or advertised. The store is a regular and consistent advertiser, combining style and price appeal with greater emphasis on regular year-round business than upon special sales.

The present trend away from sale stores and sensational price appeal and toward businesses with established standards of quality and value greatly favors the growth of the Joseph Horne Company business, which has been outstanding and consistent in these policies."

Application will be made to list this Common Stock on the Pittsburgh Stock Exchange.

New York City (Herald Square Realty Corporation)

First Mortgage Leasehold 6% Sinking Fund Gold Bonds (Closed Mortgage)

Dated May 1, 1928

Due May 1, 1948

Location: The Herald Square Building will be situated in the heart of the midtown business and mercantile district, occupying the entire block at the apex of Broadway and Sixth Avenue between 35th and 36th Streets. This nationally known site was formerly the home of the New York Herald, now the New York Herald Tribune, one of the country's leading newspapers. This location on New York's principal artery of traffic, one block west of Fifth Avenue, is one of the most prominent in New York City. The location is accessible to the greatest number of transit facilities of any point in Greater New York.

Building: The Herald Square Building will consist of a 24-story and basement building of modern fireproof steel construction, to be designed for offices and salesrooms and to be erected on the northerly part of the lease hold premises, and the three-story building now located at the southerly portion of the property, the two buildings to be so connected as to form a single structure. The building to be erected will occupy a ground area of approximately 14,000 square feet of the entire area of about 20,000 square feet comprising the leasehold estate. An arcade extending through the building will connect Broadway and Sixth Avenue. The building will have a rentable area of approximately 305,292 square feet, which includes the 25,993 square feet in the present three-story structure located on the southern portion of the property.

Security: This issue will be secured, in the opinion of counsel, by a closed direct first mortgage on the leasehold estate of Herald Square Realty Corporation in the land and building to be erected on the northerly portion thereof, as well as in the present structure on the southerly portion of the premises. The land extends about 212 feet on Broadway, 197 feet on Sixth Avenue, 60 feet on 35th Street, and 136 feet on 36th Street, and comprises about 20,000 square feet. The leasehold estate in the land and in the building upon completion has been independently appraised by Cushman & Wakefield, Inc., and by Pease & Elliman, Inc., both of New York City, as having a value of not less than \$4,100,000, thereby making this issue less than a sixty-one per cent loan. The lease will be extended in accordance with its terms to June 1, 1963, with the privilege of renewal for an additional twenty-one years. The average annual rental under the lease during the period extending to the maturity of these bonds will not exceed \$167,500. A surety bond in favor of the Trustee, guaranteeing completion of the building, will be furnished. Title insurance will be carried, payable to the Trustee. Fire and rental value insurance will also be carried.

Cushman & Wakefield, Inc. and Pease & Elliman, Inc., both of New York City, have estimated the annual net income of the building. The lower of these estimates is as follows:

Rogers, Peet Company, a prominent high-grade men's clothing firm, operating a chain of retail stores in many parts of New York City, has leased approximately 10,686 square feet of floor space on the ground floor of the three-story structure located on the southerly part of the premises, and on the ground floor of the new building, together with basement space, at an annual rental of \$150,000 a year until 1933, with the privilege of two six-year renewals at the same

## Municipal Bonds

THE better class of American municipal obligations—issued under proper legal restrictions—are justifiably regarded as investments of the highest class. This high degree of safety, together with the tax exemption feature, has made high-grade municipal bonds the choice of a large number of institutional investors, as well as wealthy individuals whose incomes are such as to make the inclusion of a certain proportion of tax exempt securities desirable.

Among the municipal issues currently offered on Lawrence Stern and Company's list are the following:

Chicago South Park Commiss Aug. 1, 1946 City of Detroit, Michigan Sept. 15, 1955-57 Dec. 1, 1943 Chicago Sanitary District July 1, 1935-48 State of North Carolina

We suggest that investors consider carefully the possibility that it may prove desirable to add a certain proportion of sound municipal obligations to their lists of securities. It should perhaps also be pointed out that it is frequently desirable for the holder of municipal securities to analyze his investment list, with the view to determining whether or not he might arrain a requisite degree of safety, plus a higher income return, by substi-tuting a certain proportion of sound corporation bonds. The Statistical Department of this company is at your service for the purpose of making a careful analysis and calculation as to the desirability of including or excluding tax exempt securities in your list.

GOLD Losses and the

COUNTRY'S RESERVE POSITION

OHE reduction in the United States gold stock in 12 months has been approximately \$300,000,000. The amount, however, is relative. The country could lose \$700,000,000 more without serious impairment of its reserve position, and then it could call in the billion dollars of gold certificates in circulation and issue more Federal Reserve notes.

Not a bad thing for the business man to know. Facts are comforting. Rumors and gossip are disturbing.

The banker has to know many things of this kind if he is to guide his customers along paths of financial safety.

### DETROIT & CANADA TUNNEL COMPANY

Twenty-Year 61/2% Convertible Sinking Fund Gold Debentures

To be dated May 1, 1928

To mature May 1, 1948

GUARDIAN TRUST COMPANY OF DETROIT, TRUSTEE

Issuance approved by Michigan Public Utilities Commission.

Convertible, until redemption, into shares of No Par Value Common Stock of the Company as follows: the first \$2,000,000 of debentures surrendered for conversion, at the rate of 125 shares of No Par Value Common Stock for each \$1,000 Debenture; the next \$2,000,000 of Debentures surrendered, at the rate of 110 shares for each \$1,000 Debenture; the next \$2,000,000 of Debentures surrendered, at the rate of 90 shares for each \$1,000 Debenture; and the last \$2,500,000 of Debentures surrendered, at the rate of 80 shares of No Par Value Common Stock for each \$1,000 Debenture.

For information regarding the Company, these Debentures and the security therefor, attention is called to the letter of Mr. William A. Comstock, President of the Company, copies of which will be furnished on request and from which it will be noted among other things, that:

PROPERTY: Detroit & Canada Tunnel Company (a Michigan corporation) will build a vehicular tunnel, about one mile long, under the Detroit River, which will provide a direct highway connecting the heart of Detroit's business and shopping district with that of Windsor, Ontario. The Company, directly or through a wholly owned Canadian subsidiary, will own and operate the entire tunnel development including the downtown real estate in both cities to be used for terminal facilities.

INDENTURE PROVISIONS: These \$8,500,000 Debentures will be a direct obligation of Detroit & Canada Tunnel Company and will be issued under an Indenture, which among other conservative restrictions will prohibit the mortgaging or pledging of any of the Company's assets without equally and ratably securing these Debentures. The Debentures will be junior to \$8,500,000 First Mortgage 6% Sinking Fund Gold Bonds (closed issue), and will be followed by 3,100,000 shares of No Par Value Common Stock (of which 850,000 shares will be feserved for the conversion of Debentures).

Surety bonds, for the performance of contracts for the construction and completion of the entire tunnel, and terminal buildings, will be deposited with the Trustee.

ESTIMATED EARNINGS: Thorough traffic surveys, taking into account the existing ferries and the bridge under construction, have been made independently by Ford, Bacon & Davis, Inc., Parsons, Klapp, Brinckerhoff & Douglas, and Mr. Daniel L. Turner, Consulting Engineer, New York. The lowest of the above mentioned estimates of earnings for the first year of operation of the tunnel indicates total net income (after allowance for all local taxes and including estimated miscellaneous earnings of \$185,000) of \$1,666,000, or over 1½ times the maximum combined annual interest requirements of the First Mortgage Bonds and these Debentures. After deduction of First Mortgage Bond interest the balance of net earnings is equivalent to over twice the maximum annual interest requirements of these Debentures. Corresponding earnings for the fifth year of operation are estimated at \$2,402,000, or over 2½ times the maximum combined annual interest requirements of the Bonds and Debentures.

SINKING FUND: The Indenture will provide for semi-annual sinking fund payments of increasing amounts commencing September, 1, 1932, and estimated as sufficient to retire the entire issue at or prior to maturity.

The above information is obtained from reliable sources and, while not guaranteed, is believed to be accurate

## Electric Public Utilities Company Three-Year 5% Gold Notes

Dated May 1, 1928

Due May 1, 1931

GUARANTY TRUST COMPANY OF NEW YORK, Trustee

Mr. R. A. Pratt, President of the Company, advises as follows:

General Information: Electric Public Utilities Company, a Delaware corporation, will operate, directly or indirectly through its subsidiaries, a group of electric, gas, electric railway, ice and water properties in over one hundred communities located in the States of Colorado, Illinois, Kansas, Louisians, 'Maryland, Mississippi, Ohio, Oklahoma and Texas. It will serve a population, exclusive of the City of Chicago, of more than 350,000. Electric energy for light and power is supplied to over eighty-three communities in six states. Natural gas is supplied to two cities in Oklahoma. A district hot-water heating system is operated in conjunction with electric service in Findlay, Ohio. Profitable electric railway, freight and passenger service is provided between Findlay and Toledo, Ohio.

In Louisians, Mississippi and Texas, thirty-seven communities are served with ice. In Chicago over 6,000 secounts in the Loop District will be served with ice on a contract basis, and a substantial ice business, chiefly wholesale, will be conducted in other populous centers of that city.

Purpose of Issue: The proceeds from the sale of these Notes will be used for the retirement of maturing obligations and for general corporate purposes.

\* Earnings: The earnings of Electric Public Utilities
Company and subsidiaries, including those to
be presently acquired, for the year ended December 31, 1947,
after eliminating certain non-recurring charges, were as follows:

Sometimes it is necessary for him to a something he doesn't want to do—oesn't want to do, at all—in fact, hates the idea of doing. At last: "Do I have to do it?" he says. And his mother has never been able

to say, "Yes, you have to do it." She can say, "I would like it very much if you would," or, "I certainly think you should." But not, "You have to do it." And no matter how important the issue, how distasteful to the boy the thing may be, she has never yet said, You have to do tt."

Somehow she can't, she says—the words won't come. To her that would represent the use of force, an outside represent the use of force, an outside power compelling him against his will; while her idea is that what he does should be done of his own volition. More often than not the desire to do what she asks exists in him. But if it doesn't, she thinks the desire should be created somehow, instead of the ac-tion being forced.

Often this can be done by explaining —sometimes she will resort to the simple human apepal, "You don't have to, but it would please me if you would." Then the doing of it comes from within, because the desire is there

uncheon at the Palmer with Frank Lee, repree U. S. of the national, as the speaker on "A of Nationalist China." It want to one bit."
To which she replied, "Yes, you do we do the thing we want to do, really."
And she went on to analyze it. "You may flot want to do this thing more than anything else in the world, but you want to do it more than the other thing which it would be possible for you to do in its place. You say you'd rather stay at home tonight and read of the late Mr. and Mrs. Matthew T. Scott of Bloomington, Ill., who has point your cousin who has had the

a book. But if you do that, you'll disappoint your cousin who has had the tickets for this play for two weeks. And deep down, you'd rather go with her than stay at home with a guilty conscience. So you're really doing what you want to."

So with the children. We can put things to them in such a way that they will really want to do what you ask more than any other possible thing and you will all be pulling together. [Copyright: 1928: By The Chicago Tribune.]

PATTERNS BY CLOTILDE

WOMAN'S OR MISS' DRESS Shoulder and waistline bows slipped through slashed openings lend unusual interest to this charming design. It is just the preitiest dress imaginable made of printed chiffon, silk crèpe, printed in dots, georgette crèpe, flat silk crèpe, rayon printed voile or lace. Both skirt and waist are in two pieces. The pattern, 3032, comes in sizes 16 and 18 years and 36, 28, 40, and 42 and 18 years and 36, 38, 40, and 42 inches bust measure. Size 36 requires 2% yards of 40 inch material with 2½ yards of 3 inch wide ribbon.

from within, because the desire is there to please her.

Don't misunderstand. She is not a weak or vacillating woman. Her child is not at sea, doubtful of the course of his life. His mother expresses herself very definitely and really has achieved a very high degree and kind of obedience. But she doesn't believe in force. To her it implies opposition, and she wants to work with her boy, not against him.

Asymmetry Still Favored by Fashion

Corinne Lows NEW YORK .- [Special Correspondent nce.]-We are so surprised that we feel like saying, "Ah, symmetric!" instead of just plain asymmetric. For after a whole winter's dogged fidelity to this one sided effect forks are doing it just as much as ever. And this spring they have discovered heaps of new ways to make the asymmetric line more arresting than ever. metric line more arresting than ever.

Here is a black satin back crèpe frock from Chantal to prove what one means. Before saying anything about this model, however, let it be remarked that the black satin crèpe frock still possesses the same ascendancy over our thoughts that it did during the winter. This spring, if you look about you at any fashionable lunching or teaing retreat, you will find the same phenomenon. The very smartest women present are wearing their gowns of this material and color.

And one may add that hand in hand with this apotheosis of black satin

And one may add that hand in hand with this apotheosis of black satin back crêpe for fashionable daytime wear one finds a corresponding fashionable emphasis upon beige and white satin back crêpe for the evening gown. Some of the models in this two-faced material contrast both surfaces. Others show nothing but the lustrous side. Nearly always they are asymmetric in their inspiration. Thus we find in the above mode made entirely of the satin side, a one sided lift of the inset belt and a one sided placing of the plaited godet. ing of the plaited godet. With all that's been said and writ out in-laws, to say nothing of rt records of broken marriages mothers-in-law, one wonders ng people keep on marrying cumstances that are going to ie the notorious trouble makers.

It isn't a question of whose fault it is that all do not get along. It may be ther the fault of the mother-in-law, a daughter-in-law, nor the son-in-law. imply an infringement on an old rule that says no house is large gh to include in-laws.

Laura lives with her husband's and stepfather. She works mother and steplather. She works days, and when she gets home evenings she is not allowed to do anything in the way of work at all. The mother-in-law's intentions are the best in the world. And it might be interjected here that if the mother-in-law left the world for the stall it all the mother-in-law. left the work for the girl to do on her

The mether does all the babying of her son and the wife feels foolish attempting to do it after his mother. She pets him, calls him endearing names. Laura feels like a mimic if she repeats them. They tell her she is cold, when his mothing of the sort.

She addres her husband, but is miscrably unhappy in her present environment. Instead of making the confident of his wife it is the woman who has been his confident since childhood her runs too—his mother. The wife is left to the dark as to his movements. And so on and so on. The old, old story, with the husband pittfully blind as to what alls his young wife.

#### FARM AND GARDEN BY FRANK RIDGWAY

Next Sunday is the regular day for transplanting tomatoes in many Chicago gardenes. Not many gardeners feel safe if they set their tomatoplants out earlier than May 20.

Tomatoes are queer plants. They not only like warm weather but do not thrive in wet soil. There is an old saying among growers that tomatoplants do not like wet feet.

If tomatoes are set in a poorly drained soil the fruit will be badly injured during the ripening season. Strubinger of the Illinois station says tomatoes like a rich soil. The crop responds to an application of manure, either broadcast over the field or placed directly in the hole. The usual plan where hill fertilization is practiced is to put a mixture of steamed bone meal, dried blood and potassium, sulphate in the hill at the rate of one-fourth pound to the plant.

He advises planting tomatoes four tet apart for the early varieties on tills of the poorer types to five by we feet for the later varieties on the

five feet for the later varieties on the more fertile soils. Set the plants deeper than they stood in the hotbed or cold frame.

In buying or selecting plants from a hotbed see that they have big root systems with strong, stocky tops. Keep as much soil as possible on the roots in transplanting, and put loose soil around the plants when they are set in the open garden. Strubinger recommends cultivating tomato plants immediately after they are transplanted.

Into the Open Grave.

A few years age, while attending the funeral of a friend, I had my most embarrassing moment with the mourners and friends, I had gathered at the graveside. While waiting for the last words to be said I nervously kicked at a little clod of earth. My satin pump was loose and off it flew and landed in the gaping grave.

I had to stand there in my stocking foot, frying to death in my blushes, and wait while a man fished out that dreadful pump.

For embarrassing moments the above surely takes the cake! M. K.
